## Vinification

Destemmed and pressed harvest.

Fermentation with indigenous yeast and no added sulfur.

An ancestral method of bottling wine that is only partially fermented.

While the first and only fermentation continues in the bottle, the resulting carbon dioxide is trapped.

After a rest period of a few months, the gas is absorbed into the bottled wine in the form of bubbles.

**COLOR** : intense raspberry.

**NOSE** : subtle aromas of red fruits (raspberry and wild strawberry).

**PALATE** : fruity, fine and delicate bubbles, very fresh.

## PET NAT ROSE

*Born from a natural effervescence, this sparkling wine is without sulfites, unfiltered and slightly cloudy. Its foam is light and the fruit aromas intense. Served chilled, it will be perfect as an aperitif or after the meal, to end the evening well....*
